INTRODUCTION

We are Service

UTAH STATE OFFICE OF EDUCATION

We are service!

On behalf of the State Board of Education, I convey to you our commitment to serve the needs of public education. The staff of the State Office of Education rededicates its efforts to support and strengthen every facet of the Utah public school system.

We are moving forward in the first full school year of the last decade of the 20th century. Our K-12 system is bigger than ever, with over 20,000 teachers who serve almost 445,000 students. We pledge our resources to empower every child to succeed and grow to be a competent and caring adult.

As my deputy and associate superintendents and I endeavor to re-establish this role of service and review our relationships with school districts and educational organizations throughout the state, we are finding among them an encouraging desire to work together and to solve our mutual problems.

But educators cannot do the job alone. We challenge all Utah citizens, and especially parents and other family members, to take time to visit our schools and to take an active, personal interest in what they are doing. Parent involvement that reinforces the work of our teachers to help our young people excel will be a major emphasis of my superintendency.

This Annual Report describes and highlights major accomplishments of the state education agency during FY 1989-90, including services we have provided to local school districts and other agencies that improve the quality of education for students. Additional statistical, financial, and test data are contained in supplements to this report.

EDUCATION SUPPORT SERVICES

Scott W. Bean
Deputy Superintendent

Certification and Personnel Development

In 1989-90, Utah reported a total of 20,577 professional personnel: 9,982 elementary classroom teachers, 402 elementary principals, and 140 other elementary personnel such as media directors and counselors; 1,634 middle school teachers, 79 middle school principals, and 80 others; and 6,643 secondary teachers, 326 secondary principals, and 440 others.

Included in this total are also 408 district-wide instructional personnel; 343 supervisors and directors; 28 others such as specialists, social workers, and psychologists; 40 district superintendents; 32 administrative assistants; and 146 interns. Davis and Salt Lake counties employed 51% of the total personnel and served 51% of the state's total student enrollment.

Since 1988, most Utah teachers have been endorsed in the core subjects they actually teach, some through demonstrated competency or other means to expand their fields of expertise. Since that time, authorizations have been given for certificates and endorsements where the person has yet to complete a minor or other requirement; hence the increase in total authorizations granted.

In 1989-90, special education teachers remained the most critically needed in Utah as a whole, and large urban districts are reporting a growing need for elementary teachers. The certification system continues to be refined, with middle level endorsements now eliminated. Efforts are progressing to establish K-12 inclusive endorsement for teachers of art, music, and English as a Second Language.

AVERAGE TEACHER SALARIES
(Excluding Career Ladders)

	1987-88	1988-89	1989-90
Regular Classroom Teachers	$22,572	$22,852	$23,686
Principals	36,978	37,509	39,137
All Instructional Staff	23,364	23,677	24,591
Supervision & Administration	36,394	37,576	37,974

TOTAL TEACHER AUTHORIZATIONS ISSUED 1989–90

ELEMENTARY	44
SECONDARY	557
ADMINISTRATION	26
SPEC. EDUCATION	167
SPEECH COOR.	22
SCHOOL PSYCH.	2
COUNSELOR	31
INSTRUCT. MEDIA	3
DRIVER EDUCATION	9
ELEMENTARY MUSIC	4
TOTAL	**865***

*Comprises 4.2% of total teachers in Utah

Actual minimum salaries vary widely across the state, remain significantly lower than the national average, and continue to present a challenge to school districts in their attempts to attract and retain quality teacher personnel. Teacher career and other scholarship programs designed to train new teachers in the profession, especially in subject fields of shortage, are continuing.

Total Number of LETTERS OF AUTHORIZATION From 1970–89 and the Percentage of the Total Personnel

Year	Total No. Authorizations Issued	Percent of Total on Authorizations
1985	171	0.9
1986	312	1.6
1987	313	1.6
1988	911	4.5
1989	865	4.2

A new booklet on procedures for evaluating teacher education programs was written and distributed to Utah's six teacher education institutions during 89-90. The booklet is the procedural manual for the program approval process which is a significant factor in promoting quality teacher education programs at both the undergraduate and graduate level.

RANKINGS OF MINIMUM SALARY SCHEDULES FOR UTAH TEACHERS 1989-90

Bachelor's Degree	Master's Degree
Rank #1: $14,544	Rank #1: $15,584
State Average: $16,040	State Average: $17,733
Rank #40: $18,765	Rank #40: $21,114

School Accreditation

During the 1989-90 school year, 155 schools were accredited by the Northwest Association of Schools and Colleges. This included 97 high schools, six middle level schools, 17 elementary schools, four K-12 schools, and 31 special purpose schools. In addition, the State Board of Education accredited 88 elementary schools and 75 middle level schools. All completed a report indicating how well their schools are meeting specific categorical standards.

The reports include data on graduation requirements, implementation of the core, teacher and student attendance figures, testing programs, drop-out rates, student educational plans, class periods per day, counseling, and compliance with state laws. During the 1989-90 school year, 29 full team evaluations were completed: five elementary schools, five middle level schools, 11 high schools, seven special purpose schools, and one K-12 school. Thirty follow-up school visits were also made.

International Education

A significant increase in interest and participation in international education programs and activities motivated the State Office of Education to sponsor or co-sponsor a number of workshops and institutes in 1989-90 involving about 300 teachers. Resulting district workshops have involved several thousand teachers and could make a potential impact on 85% of Utah students.

The State Office of Education's International Education Resource Center is being used extensively by teachers. Teaching units, resource material, artifacts, filmstrips, videos, and prints are in constant demand. A number of districts have initiated their own international centers to make such resources more accessible.

A strong network in international education has developed among the State Office of Education, district offices, individual teachers, universities, community organizations, private groups, student exchange programs, and other entities. A college-level organization for international students and closer cooperation between district personnel are among the results.

Law-Related Education

During FY 1989-90, the Mock Trial Competition increased in participation from 65 to 72 schools representing 16 school districts and four private schools and in the number of volunteer attorneys and community volunteers serving as attorney coaches and judges. A permanent Utah Law-Related Education Program office was established at the Utah State Bar Law and Justice Center.

A Drugs in the School Program was implemented by the state substance abuse prevention specialist and 50 teachers from five Wasatch Front districts in cooperation with the Center for Civic Education, the Constitutional Rights Foundation, and the National Institute for Citizen Education in the Law.

The Mentor Program, court tours, conflict management, and teaching legal concepts in public schools have increased in population served, community support, and service from the State Bar. A second-year grant from the National Bicentennial Commission is training 40 teachers from 12 districts to teach the concepts of the Bill of Rights through children's literature and mock trials.

Concurrent Enrollment

Since its initiation by the legislature in 1987, Utah's concurrent enrollment program has grown steadily, with school districts and colleges/universities working toward better, more interactive ways of serving students in all regions of the state. Concurrent enrollment meets the needs of many students who seek a rigorous academic program to challenge them during their high school years. Although overall funding has increased, the cost per quarter hour declined significantly in 89-90.

STATEWIDE CONCURRENT ENROLLMENT
3-Year Summary
1987–90

	1987–88	1988–89	1989–90
Students	2,425	3,137	3,962
Quarter Hours	23,402	30,923	37,640
Total Cost	$200,000	$367,168	$381,895
Cost per Hour	$8.55	$11.87	$10.15

Early Graduation

At the end of the 1989-90 school year, 52 students in 15 school districts completed their high school graduation requirements at the end of their junior year. Of these 52 students, 30 indicated they planned to attend a two- or four-year Utah college or university. When they are admitted, these early graduates are eligible for a tuition scholarship equal to 25% of the weighted pupil unit. School districts receive the same percentage for the following year when the student would have been a high school senior.

Beginning last fall, students were eligible to graduate during the senior year at the end of the first quarter, the semester, the third quarter, the first trimester, or the second trimester. They are eligible for the proportionate amount of the tuition scholarship if admitted to a Utah college or university. School districts receive an equal amount for the following year.

Principals Academy

During 1989-90, the Utah Principals Academy generated participation by a total of 190 principals and involved 12 secondary and 24 elementary administrators in a series of in-depth inservice seminars as Academy Fellows. Now in its seventh year, the Academy in 89-90 also provided incentive cluster grants to nine districts, wrote an official Academy charter, and developed a five-year training plan. Twenty district and school administrators took part in a pilot writing project for the National Association of Secondary School Principals.

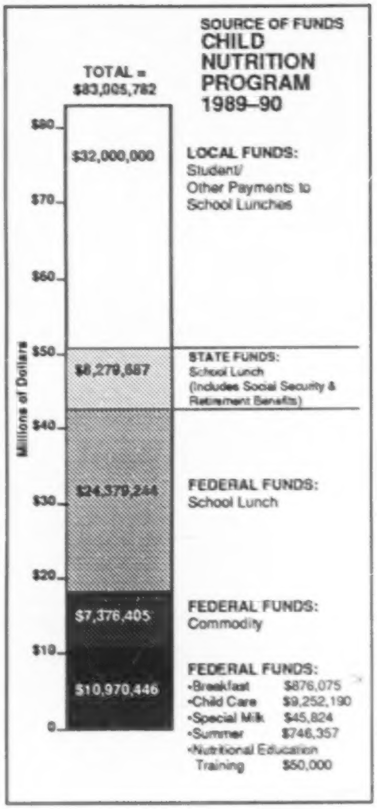
Workshops/Seminars Involving Academy	27	30	27	26	31	**141**

Child Nutrition

During FY 89-90, the Child Nutrition Section continued to administer school lunch and other food services in accord with regulations of the U.S. Department of Agriculture to public and private schools, institutions, and summer camps. The section staff provides leadership and technical assistance in seven programs: national school lunch, school breakfast, adult care food, summer food, special milk, commodity distribution, and nutrition education and training.

In 1989-90, a strategic planning committee was formed to establish five-year goals for Utah's Child Nutrition programs. The six goals that were identified and are now being implemented focus on technology, marketing, educational involvement, strategic planning, economic support, and training. Emphasis is being placed on attracting increased student support and educational involvement of school food service personnel.



Computer Services

The 1990 Utah Legislature's mandate for a new testing program required the State Office of Education to create an intensified system to score tests for over 100,000 students in the 5th, 8th, and 11th grades. Detailed individual student profiles were produced for every student. Districts also received summary information at both the school and district levels. The scoring and reporting were completed by mid-November, 1990.

1989-90 was the pilot year of use by three schools of OASIS (Off-line Applications for Student Information Services), an hour-by-hour attendance system which prints teacher attendance records with scanner input for quick updating. OASIS is especially helpful to counselors and administrators in tracking attendance patterns of high risk students. Twenty-two schools are currently using the system.

Several new report formats have recently been designed to meet unique school Student Information System (SIS) needs. Notable are two evaluation formats which help the counselor, parents, and student determine how well the student is meeting graduation requirements. Also new are reports that track and update citizenship credits.

Individual school input capabilities have been added to the section's automated fiscal system. Local school district personnel can now initiate warehouse orders and purchase requisitions electronically from terminals in their schools. This speeds up "turnaround time" and significantly reduces paper flow and the workload of school district staff. The new system takes advantage of advanced database technology to give users a much broader spectrum of on-line inquiry and reporting capabilities.

Information Services

The State Office of Education's Information Services Section continued during 1989-90 to process data in teacher certification, State Office accounting, rehabilitation client accounting and statistics, and statewide finance for school district expenditures and projected budgets. Yearly and monthly reports were prepared to fulfill federal and state requirements. The production of these records is essential to the accountability and information needs that play a vital role in the successful accomplishment of the work of the agency.

Educational Equity

The State Office Educational Equity Section's 1989-90 mission was to assist school districts in their effort to reduce the impact of ethnic, gender, and racial discrimination in the public schools. Empowerment of administrators, teachers, and impacted populations of students is the goal of coalitions, consortiums, and other groups that bring about interaction among school districts, higher education, and the public and private sector.

Particularly successful among these were four regional ethnic minority student/parent conferences held in spring, 1989, at Grand High School in Moab, Utah State University, Weber State University, and the University of Utah. Over 1,000 Hispanic, Black, Indian, Indochinese, Pacific-Islander, and other minority students, parents, and educators from 11 districts attended. The agenda focused on the student education plan, college admission tests, scholarships and financial aids, parent involvement, and self-esteem.

Targeting the improvement of the math/science skills of ethnic minority students and females has resulted in the expansion of the MESA (Math, Engineering, and Science Achievement) program from 60 students in two schools five years ago to almost 700 students in 20 schools. Improvement of math scores on achievement tests, attendance/GPA and self-esteem, and strong parent involvement are strengths of MESA.

Gender equity continues to be a strong effort, particularly in the upgrading of female performance and participation in advanced math classes. Every junior and senior high school in the state sends students to the annual Expanding Your Horizons conferences where they experience "hands on" workshops and learn about exciting professions available to those with good math skills. The Math/Science Speakers Bureau provides role models.

GESA (Gender, Ethnic Expectations, and Student Achievement) trained over 50 facilitators in several districts to train teachers in targeted schools. A 1990 increase of LEP (Limited English Proficient) students in Utah has led to a federal Title VII Bilingual Education grant that increases the scope of technical assistance available to requesting districts. However, only about 2,500 of the more than 11,000 identified LEP students in Utah could be served with the funds provided.

Internal Accounting

In 1989-90, the Internal Accounting Section continued to monitor the fiscal accountability of the State Office of Education, State Office of Rehabilitation, and Minimum School Program, and to be the fiscal regulatory agency for the applied technology centers, the fine arts programs, the Utah State Hospital, the Utah State Training School, Corrections Education, and the Child Nutrition Program.

It fulfilled fiscal responsibilities and funding priorities of the State Board of Education/State Board for Vocational Education and served as a resource to the State Office of Planning and Budget, Legislative Fiscal Analyst, and all education-related legislative subcommittees to assure the cost-efficient use of education dollars in alignment with current needs.

During the year, the section was responsible for processing over $800 million in expenditures from approximately 75 different revenue sources and performed such vital tasks as state and single audits, budget preparation and maintenance, payroll, purchasing, cash receipting, inventory and expenditure control, and negotiation of indirect cost rates.

Human Resource Management

During 1989-90, the Human Resources Section completed 64 personnel recruitments and 65 job reclassifications, conducted 11 training sessions on seven topics, and advised approximately 500 supervisors and managers about employee discipline, corrective action, grievances, and human resource policies. Training sessions were held for State Office staff on performance management, flexible benefits, sexual harassment prevention, pre-retirement, new employee orientation, CPR training, and health awareness.

During the year, the section also assisted 22 Utah school districts with employee screening and selection, salary surveys, sexual harassment prevention training, criminal background checks, employee handbook development, classified employee systems, and custodial inservice training. The Human Resources Section assures high-caliber personnel at the State Office of Education who implement the policies that affect the quality of teacher and student performance.

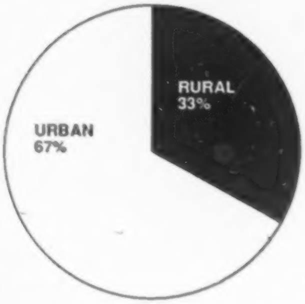
Rural Education

Rural schools have a long history of providing quality education to children. They are filled with teachers, administrators, students, and volunteers whose creativity and commitment are illustrated by innovative curricula, integrated technology programs, provisions for students with special needs and interests, and an ability to do a lot with little.

In 1990, Utah's rural areas had 229 schools organized into 28 school districts. These 133 elementary schools, 37 middle schools, 53 high schools, and six special schools make up 33 percent of the state's school system. Big Water School, near Lake Powell, and West Desert School, along the remote Utah-Nevada border, are two of the state's eight rural schools that serve students in all grades K-12.

Average rural school enrollment was 391 students. Box Elder High School, which served 1,552 students, still had the largest school enrollment in Utah's rural counties. Yet four schools with under 60 students are located in the same county. A school can be located as far as 150 miles from its district office, students can travel over an hour on a school bus each way, and secondary students may need to live away from home to attend school. Some Tooele County students go to school in Nevada, and several from Wyoming ranches attend in Daggett County.

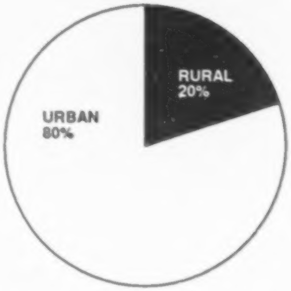
PERCENT RURAL AND URBAN SCHOOLS IN UTAH 1990



Many rural schools have gymnasiums, computer labs, and well-equipped libraries and vocational workshops, but others depend a lot on educational technology. Instructional television broadcasts, microwave television networks, audio-graphic phone lines, and other distance learning devices are opening new doors to learning and giving hundreds of rural students opportunities for concurrent college enrollment.

The average class size for a rural Utah teacher is 20 compared to 23 for urban teachers, but rural classes often have multi-grade groupings. The role of the multi-grade, either at a one-teacher school or at one with fewer teachers than grade levels, stretches teacher capacities beyond the norm. Teachers in small, rural schools have to be competent generalists, individualize instruction, carry on multiple activities, sequence skills across grade levels and content areas, and occasionally may also need to act as the nurse or plumber.

PERCENT RURAL AND URBAN STUDENTS IN UTAH 1990



In 1990, most teachers in Utah's smallest high schools must still complete more than four different course preparations a day, coupled with a variety of extra-curricular responsibilities. Due to limited staffing, about one-third of rural teachers are assigned course work outside their area of content specialization, and, in general, enjoy less access to collegial sharing and resource exchanging than do urban teachers.

Outcomes-Driven Education

In 1989-90, all Utah school districts were using Outcome-Based Education (OBE) to some extent, and the approach most often used to apply OBE concepts in the classroom was the Outcomes Driven Developmental Model (ODDM). It is a flexible process to improve all facets of school operation based on the premise that all students can learn.

ODDM encourages voluntary collaborative change on the local level in such things as instructional practices, curriculum design, school climate, and school management. About 160 Utah schools in 24 districts are currently using ODDM principles and processes to restructure teaching and learning and improve their overall productivity and effectiveness.

Regional Service Centers

Leadership provided by Utah's existing four regional education service centers (RESCs) has contributed many school improvement activities in their localities. Directors of the centers meet regularly as a planning group, joined by two State Office of Education staff members (the RESC liaison and the rural schools specialist) and others as needed. The centers were jointly responsible for introducing Outcome-Based Education and organizing the annual Rural Schools Conference and the Utah Institute for School Improvement.

Efforts facilitated by the centers provide services available to districts on a cooperative, but not an individual, basis and provide for more efficient utilization of available resources. A federal grant to improve Utah's regional education service centers has existed since 1988. The Central Utah Educational Services (CUES) center has a strategic plan. Alpine, Provo, and Nebo Districts feel a center in Utah Valley is needed.

DISTRICT MEMBERSHIP IN CENTERS OR IN CENTER PLANNING GROUPS

School Finance and Statistics

During 1989-90, the School Finance and Statistics Section continued to provide funding and related services for the regular K-12 statewide public school system; to collect and report a wide variety of fiscal and non-fiscal data; to oversee the four overlapping 18-month public education budgeting cycles; to hold annual regional public hearings to gather statewide input on the State Board of Education's legislative request to the Governor; and to provide a variety of related technical assistance services to local school districts and other agencies.

School Finance Study

The most important accomplishment of the School Finance and Statistics Section in 1989-90, apart from the ongoing conduct of financial business for the Utah public school system and related agencies, was the completion of the first comprehensive study of Utah's school finance system since 1973. Its purpose was to prepare a revised finance act for the state's Minimum School Program and enhance educational equity among Utah school districts by restructuring its school finance formulas.

The study concluded that the primary formulas for taxation and revenue distribution that support Utah's public school system are generally equitable; that formula changes which enhance equity can and should be made; that the Minimum School Program can become more efficient and less cumbersome if some programs are consolidated; and that districts should be given authority to make more of their own funding decisions.

Enrollment Demographics

Utah's birthrate remains the nation's highest, its average family size the largest, and its median age the lowest. The annual average growth rate for the 1980s was half of what it was in the 1970s (about 1.6% versus 3.3%), but Utah continued to grow at a much faster rate than that of the U.S. as a whole (1.0%). Utah still has the highest proportion of school-age children in the country.

In addition, out-migration of the later 1980s has steadily declined, with the result that school enrollment is still rising. The 1990 fall enrollment count was 444,732, an increase of 8,970 (2.1%) over the previous year. While live births peaked in 1980-82, resulting in kindergarten entrants peaking in 1985-87, about 1.3 kindergartners entered the system in 1990 for every graduating senior who left in 1989.

Public Education
ENROLLMENT PROJECTIONS*
1991-92 through 1995-96

SCHOOL YEAR	FALL ENROLLMENTS	INCREASE OVER PREVIOUS YEAR	
1991-92	451,331	6,599	1.48%
1992-93	453,590	2,259	0.50%
1993-94	455,292	1,702	0.38%
1994-95	454,647	(645)	-0.14%
1995-96	452,284	(2,363)	-0.52%

* Based on preceding two years.

NOTE: Unexpected change in migration patterns could substantially alter estimates of student enrollments.

Source: State Office of Education,
School Finance & Statistics

Although total enrollment is expected to stabilize by 1994, Utah still faces the problem of a "bubble" of large classes moving up through the grades. In 1990, this "bubble" was centered around the fourth grade. In 1995, it is projected to be in grades eight, nine, and ten, comprising what may become the largest single statewide school grade enrollments in Utah history.

Utah State Office of Education School Finance and Statistics

Resulting Challenges

The reality, then, is that Utah's school system will continue to face both programmatic and financial stress for years to come. Utah has consistently ranked low in current expenditures per pupil, dropping from 45th place in 1975 to 51st in 1989. In 1975, Utah's expenditure per pupil was about 75% of the national average, but in 1989, that figure had fallen to 61%. During the same 14-year period, our school-age population increased about 42% while it was taking an 11% drop in the rest of the nation.

Average School Enrollment per District 1989–90

State	Enrollment	Rank
Maryland	29,117	3
Utah	**10,894**	**7**
National Average	2,667	
Montana	282	51

Comparison in Number of School Districts in Utah and Other States in the Continental U.S.

State	Number of Districts	Rank
Nevada	17	49
Delaware	19	48
Maryland	24	47
Rhode Island	37	46
Utah	**40**	**45**
Mountain States Average	140	
National Average	310	
California	1,010	2
Texas	1,080	1

The school system continues to cope with a remarkable degree of efficiency under these constraints. Despite significant enrollment increases, the number of schools actually fell from a high of 732 in 1987 to 726 in 1990. This suggests that Utah is focusing on operating costs rather than on physical facilities to help conserve costs.

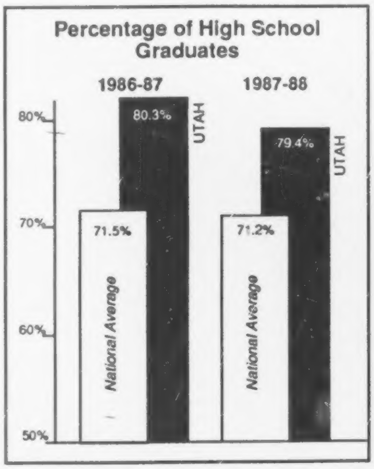
Furthermore, in 1984-85, about 73.5% of Utah's public education budget went to instruction. In 1989, that figure had grown to more than 75%. This five-year high reflects a corresponding decline in the share going to district and school administrative support. Utah is currently 30th in the nation in the proportion of total current expenditures going to classroom teachers, improving from 42nd place in 1982.

Finally, in spite of having the highest ratio of students per classroom teacher in the nation, Utah continues to hold the national record for advanced placement examinations taken per 100,000 population, surpasses the AP passing percentage by an impressive margin, and holds the 12th highest graduation rate. Despite having the seventh largest average enrollment per district, fewer district and school administrative staff are working with larger numbers of students.

NUMBER OF PUBLIC SCHOOLS (OCTOBER 1989)

Elementary Schools	440
Middle Schools	35
Junior High Schools	80
Senior High Schools (10-12)	40
Jr.-Sr. High Schools (7-12)	25
Four-Year High Schools	35
Special Schools	53
Alternative High Schools	18
TOTAL	726

In summary, while Utah's public education system faces long-term challenges in rising student enrollments, a moving bubble of large classes, and ensuring adequate financial resources, there is a statewide consensus of commitment to success as the fundamental restructuring of our school system moves into the 1990s.



Percentage of High School Graduates

Percentages of Utah Education Dollar Invested in Instruction & Support

YEAR	INSTRUCTION	SCHOOL SUPPORT	DISTRICT SUPPORT

STRATEGIC INSTRUCTIONAL SERVICES

Bruce T. Griffin
Associate Superintendent

Curriculum

The Curriculum Section staff continued to conduct comprehensive on-site visits to local districts during 1989-90. The state team of curriculum specialists observed in elementary and secondary classrooms, interviewed teachers and administrators, provided technical assistance, and made recommendations for improved effectiveness of instruction. The team visited 15 districts in 1989, 10 in 1990, and verified over 250 subject matter endorsements for secondary teachers in 1990 alone.

English/Language Arts

In August, 1990, 400 K-12 teachers from public and private schools throughout the state attended a week-long workshop at Cottonwood High School emphasizing cooperative learning, whole language instruction, reader response theory, and direct assessment strategies in language arts. The event was part of a summer-long project to review and refine the English/language arts core curriculum with input from over 300 teachers.

Individual schools also received inservice and technical assistance. The state reading specialist, during just the month of January, 1990, conducted 14 separate workshops and conferences about reading and language instruction involving 610 teachers. The basic importance of communication skills to the success of students as lifelong learners is prompting more and more efforts by educators to assure that every student masters the fundamentals of reading and writing.

Science

Major accomplishments in science education for 1989-90 were directed toward secondary endorsement requirements, inservice training at all grade levels, and the implementation of core assessment items. To address these needs,

USOE Core Curriculum Support Activities 1989–90

Number of Workshops Presented	308
Number of Districts Receiving Inservice	40
Number of Individuals Receiving InserviceTraining	
• Teachers	5,000
• Parents	500
• Administrators	1,000
Number of Technical Assistance Visits	1,246
Number of Private Schools Served	11
Number of College/University Educators Served	200

state staff has worked with district science supervisors/teacher leaders to expand inservice offerings and with four large districts to develop materials for Physical-Earth Science and Biological-Earth Science.

Typical of science enrichment opportunities during 1989-90 is the effort of two employees of Iomega who are also active in the field of astronomy. During the current school year, they are donating every other Friday to on-site visits to rural schools throughout the state to give youngsters a live demonstration of star facts, using telescopes, and other aspects of space science.

Library Media

A master plan for Utah's school library media programs was approved by the Utah State Board of Education in 1990. The plan provides for a specific K-6 core curriculum teaching library media skills. For grades 7-12, library media skills are integrated into the regular core. It recommends that all students in the state be served by a certificated library media specialist/teacher.

The State Office of Education, along with Deseret Book and KSL, co-sponsored the first annual Utah State Read-A-Thon to focus on the pleasures and value of reading. Participation was limited to 225 fifth graders, but all elementary students in Utah benefited by their library media centers receiving ten free books selected from the Utah Children's Book Award nominee list.

Social Studies

More and more teachers of social studies and history are using the core curriculum as a guideline for what they accomplish and are seeking a rich diversity of classroom resources to enhance their lesson plans. A variety of direct experiences in which a growing number of students participate are strengthening their ability to analyze ideas, discuss differing points of view, and polish their critical thinking skills as they prepare to become citizens of our complex and rapidly changing world.

SOCIAL STUDIES PROGRAMS DIRECTLY AFFECTING STUDENTS 1989–90

Program	Students Participating

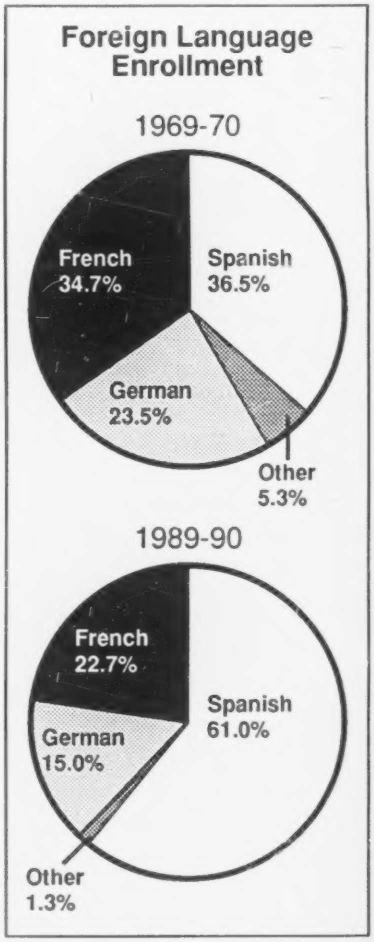
National CloseUp	**600**
Local CloseUp	**150**
Citizen Bee	**300**
Geography Bee	**1,000**
Model United Nations	**700**
History Fair	**5,000**
Mock Trials	**2,000**

Foreign Languages

The proportion of Utah students taking foreign language classes in grades 7-12 is rising again. After a dramatic rise from 18% in 1982 to 35% in 1985, it fell back down to 31% in 1989 but is more than 32% in today's high schools. 1985 was the year the University of Utah implemented its two-year foreign language study admissions requirement. Distance learning Spanish lessons have helped to bring statewide Spanish enrollment to a 1989-90 high of more than 35,000 students.

To generate increased student interest in the study of less commonly taught foreign languages, demonstrated competency guidelines were developed during 1989-90 to grant Japanese and/or Russian endorsements to current teachers identified by school or district administrators. Use of the total physical response (TPR) teaching method is continuing.



The Arts

In June and August, 1990, two week-long workshops in Orem and Cedar City were conducted in the core for dance, drama, music, and the visual arts. Elementary teachers received assistance in developing the skills and understanding needed to effectively teach the arts in grades K-6. Also, 291 teachers from 34 districts acquired ideas for projects and activities they could use as outcomes for the concepts they teach.

GROWTH IN MODEL ARTS SCHOOL SITES IN UTAH

	1985-86	1989-90
Students	7,717	38,132
Teachers	338	1,664
Administrators	38	94
Teacher Leaders	43	163
Districts	6	14
Schools	18	76

Healthy Lifestyles

Highlights in healthy lifestyles education during 1989-90 were summer camps for 450 teachers emphasizing movement/fitness and AIDS education and training; the development of "Kidsercise" aerobic videotapes for elementary grades and beginning development of a K-12 human sexuality resource guide for parents and teachers.

Much has been accomplished in the statewide K-12 AIDS Education inservice effort. During the past year, approximately 180 elementary teachers and 270 secondary teachers were trained. Regional training sessions in the AIDS curriculum are also underway for 150 Youth in Custody educators, and every elementary school in the state now has the core curriculum materials.

During January and February, 1991, a Youth Risk Behavior Survey provided by the Centers for Disease Control will be administered to a random sample of students in Utah through the State Office of Education AIDS Education Specialist. The survey will make a comprehensive assessment of student health and safety habits including depression, nutrition, suicide, and other related behaviors.

Mathematics

The basic mathematics requirement for all secondary students has been increased, with applied mathematics and pre-algebra required for all capable students K-12. Approximately 500 teachers of mathematics were involved in 1989-90 inservice programs dealing with use of technology, calculators and manipulatives, and other topics relating to the needs of elementary and secondary teachers seeking endorsement in mathematics.

Efforts are being made to train elementary teacher specialists in mathematics for the intermediate grades. Progress is taking place in the improvement of student achievement on the mathematics portion of the SAT test as evidenced by the significant rise in performance of 5th graders at the 60th percentile, 8th graders at the 53rd percentile, and 11th graders at the 54th percentile, compared to the national norm of 50.

Gifted & Talented Programs

Gifted Education made great important progress during the 1989-90 school year. The State Board of Education reviewed and passed the Rules for Educational Programs for Gifted and Talented Students in January, 1990. In support of this action, $25,000 was granted from the state superintendent's discretionary fund to conduct a series of regional workshops. The workshops addressed statewide guidelines for gifted and talented programs and strategies for implementation, as well as model programs. In the coming months, state coordination will increase.

Media Support

The services of the Curriculum Section assure the high quality and supportive resources that make Utah's K-12 core curriculum and program of studies a reality for today's teachers and students. During the 1989-90 year, it duplicated 188 30-minute, 260 60-minute, and 1,725 120-minute educational videotapes for school districts, colleges, regional centers, and other agencies.

Textbooks

As a result of a $10 million supplemental appropriation from last year's legislature, Utah's public schools were able to purchase new textbooks for schools where the needs were great. For the first time in years, most students in Utah have their own math and reading texts. Districts were able to resume purchasing cycles. The extra funding was also important because the new textbooks more closely correlated to the core.

Evaluation and Assessment

In 1989-90, the development of measurement instruments to support local school districts in assessing student performance on Utah's K-12 core curriculum continued, with end-of-level and end-of-course tests in mathematics, reading, and science, and supplemental test items coded to subject areas and grade levels of the curriculum (test item pools).

Now in operation for three years, the elementary mathematics series was used in over 30 Utah school districts in 1990. Elementary reading became operational two years ago and has been implemented in about the same number of school districts as the math series. Elementary science was completed and used in spring, 1990.

Two sets of secondary end-of-course tests have been constructed. The 11 different tests in secondary mathematics were operational in 1989 and have been extremely well received. Secondary science end-of-course tests, including all eight courses in the science core, were operational in spring, 1990.

Under the leadership of the State Office of Education, the test item pool project has involved the contributions of virtually every Utah school district, as well as colleges and universities. Twenty-five volumes of item pools have been developed to date to help teachers with student assessment.

5 MAJOR TYPES OF CORE ASSESSMENT PRODUCTS

- Conceptual Guides and Handbooks on Core Measurement
- End-of-level Tests (Elementary)
- End-of-course Tests (Secondary)
- Test Item Pools
- Training Materials

The State Office is currently engaged in the development of a variety of language arts assessment products featuring direct evaluation of student writing. These materials are being designed to give all students practical tools to improve the clarity, correctness, and overall effectiveness of their written work.

Statewide Testing Program

In fall, 1990, Utah implemented a new statewide testing program which takes the place of the Utah Statewide Educational Assessment Program. The 1990 Legislature mandated the administration of the same norm-referenced achievement test statewide to students in the 5th, 8th, and 11th grades and public reporting of school and district averages from this program.

CORE ASSESSMENT
Elementary
End-of-level Tests

Subject	*Grade Levels*
Mathematics	1 - 6
Reading	1 - 6
Science	1 - 6

CORE ASSESSMENT
Secondary
End-of-level Tests

Subject	*Courses*
Mathematics	11
Science	8

Formal responsibility for creating and planning this program was vested with the State Board and State Office of Education. The State Superintendent of Public Instruction, in conjunction with school district superintendents, appointed a 15-member committee composed of district and state representatives to plan and establish guidelines for the new program.

The test chosen was the new version of the Stanford Achievement Test. Through a legislative appropriation, all testing materials, exclusive of pencils, were pur-

	VOCATIONAL EDUCATION (3 Volumes)

chased by the State Office and provided to local school districts and schools. Likewise, the State Office of Education assumed all costs of scoring and reporting the tests.

Initial results, such as individual student profiles and school profiles, were made available to school districts by mid-November, 1990. Last December, a series of special reports were produced and sent to each local school district to share with its board of education and the public. These reports featured both average scores, which were obtained by schools and districts, as well as predicted score ranges for each individual school. This allowed a comparison between a school average and a range of scores which would be expected in schools with similar students.

District Performance Reports

The 1990 Legislature requires that Utah school districts submit an annual performance report to patrons, the State Board of Education, and the legislature each year. Copies of the district performance reports are to be distributed to the residence of each student enrolled in the district. In addition, there is broad-based support for the implementation of school district performance reports in the state.

In response to H.B. 170, the State Office of Education has provided models, training, and guidelines to enable all Utah school districts to prepare performance reports.

ACT Test Results

Results for 1990 recently released by the American College Testing Program (ACT) show Utah students scoring substantially higher than the national comparison group in both English and the composite score but lower than the national group of test-takers in math. The 1990 ACT results were limited to only English, math, and the composite scores because of the new ACT test.

Between 1989 and 1990, the scores of both students in the national comparison group and Utah students fell on the English test. National scores were down one-half of a standard scale point for this period, while Utah scores fell by three-tenths of a point. Utah scores remained stable at 19.7 in math, while national scores declined from 20.0 to 19.9 for the same period of time.

The 15,045 Utah students who took the ACT test last year represented about 67% of the total graduating class of 1990. Because Utah continues to have a very high percentage of its graduating classes take the ACT, the Utah group likely includes many lower-scoring students who would not elect to take the ACT in other states.

The 1990 ACT results showed that those students taking a rigorous 9-12 college preparatory curriculum (at least four years of English, three years of mathematics, three years of social studies, and

three years of science) scored at much higher levels than students taking a less rigorous program. Nearly three-and-a-half points separated the two groups on the math test.

An examination of the ACT scores of Utah male and female students taking the test in the graduating class of 1990 showed a continuation of previous trends. Utah female students continued to score substantially higher on the English test, while males scored higher than females on both the mathematics and the composite measure.

1990 Utah and National A.C.T. Scores

Social Studies: 3 years
Science: 3 years

Course-Taking Patterns

Findings of a survey of over 15,000 high school seniors taking at least two years of course work in each of eight major subject areas suggest a continuation of the trends in course-taking of Utah seniors which have been noted since 1984. All subjects show moderate to substantial increases in the percentage of students taking at least two years of each subject, as is shown for foreign language, mathematics, science, and art.

Findings measuring the percentage of high school seniors who took selected specific courses indicate enrollment of students in courses in the typical math sequence has risen significantly between 1984 and 1990. This trend is particularly strong for Algebra II and Geometry. During that six-year span, enrollment in chemistry rose 11% and rose just under 6% in physics. In computer-related courses, the enrollment grew from 28% to 62.3%.

COMPARISON OF THE PROGRAMS OF STUDIES OF UTAH HIGH SCHOOL SENIORS FOR 1984 AND 1990

Subject Area	Percentage of Utah High School Seniors Who Have Taken Two Years of Subject	
	1984	1990
ENGLISH OR LITERATURE	94.7%	98.3%
FOREIGN LANGUAGE	11.6%	54.1%
HISTORY/SOCIAL STUDIES	83.2%	96.4%
MATHEMATICS	65.7%	97.5%
SCIENCE	47.8%	93.8%
ART	13.5%	44.6%
MUSIC	20.5%	29.4%
PHYSICAL EDUCATION	59.9%	78.6%

Male graduating seniors in 1990 continued to take more courses in mathematics, science, and physical education than did females. Over 76% of the males took three years of math, compared to just over 70% of the females. The male-to-female ratio for three years of science was 52% to 42.9%, and for chemistry, 40% to 34.7%. In general, Utah students appear to be taking a much more rigorous program of studies in 1990 than was true half a decade earlier.

Comparisons of Percentages of Utah High School Students Who Have Taken Specific Courses for 1984 and 1990

Course	1984	1990
Algebra	78.7%	81.9%
Algebra II	48.2%	63.0%
Advanced Algebra	NA	35.1%

Project Assistance Services

During 1989-90, the Project Assistance Services Section continued to provide technical assistance to education and community leaders on education reform and to plan and conduct orientation and training in grant writing, career ladders, year-round school, and other topics using the staff's strong group process skills.

The section also continued to monitor the compliance of various state-funded reform projects, disseminate progress reports on the projects, and provide project abstracts. Significant effort was made to link people and agencies to other resources and to resolve conflicts, seek solutions to problems, and find ways to meet common and unique needs.

Technology Instruction

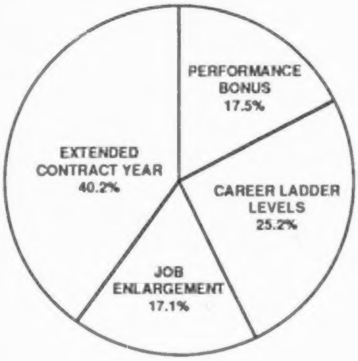
Ten technology instruction projects were funded for FY 89-90 through Project Assistance Services. One was an Alpine District project to construct a space shuttle simulator that allows up to 10 students to take a simulated space voyage. The "astronauts" will live, work, eat, and sleep in the simulator.

Fifth grade students at Hill View Elementary in Granite District will communicate and share lessons with students in the Soviet Union via satellite. Salt Lake District launched a very successful project providing CD ROM technology for library research.

Career Ladders

Utah's Teacher Career Ladder Program is funded at $34,332,300, where it has remained since 1986. Two changes are currently affecting career ladders. Multi-year approval was granted to Alpine, Duchesne, Emery, Juab, Kane, Millard, Nebo, North Summit, San Juan, Granite, Iron, North Sanpete, and Sevier Districts, who are engaged in long-range planning. Weber, Cache, Carbon, Park City, Salt Lake City, Murray, Grand, Logan, Provo, Uintah, and Tooele Districts receive all their state funding in the form of a block grant and are not subject to state Career Ladder rules and regulations. Block grants give these districts greater autonomy to make funding decisions that meet their needs.

1989-90
CAREER LADDER ANALYSIS



Modified Scheduling

During 1989-90, a record 1,671 teachers in 56 elementary and middle extended-year schools in Utah served over 46,800 students. Thirty-six other elementary schools operated extended-day schedules that affected an additional 846 teachers and 24,600 students.

Utah continues to have the nation's highest percentage of its students and schools on modified schedules. In 1989-90, the State Office, in conjunction with Jordan School District, completed a statewide evaluation of extended-year and extended-day schools.

The year also brought a new category to the incentive funding program for year-round-school effective facility use. Each of 26 schools in six districts received a $10,000 grant for having achieved at least a 15% enrollment increase over its rated capacity.

PEEPS Program

The PEEPS (Promoting Excellence and Efficiency in Public Schools) initiative targeted its 1989-90 funds for planning and evaluation purposes. For example, Emery District received a small planning grant to research and plan for a non-graded approach at Cleveland Elementary School. The total PEEPS budget for 1989-90 was $195,000, and 13 school districts received funding for projects.

Productivity Studies

Productivity projects continue to be funded in the categories of planning, collaboration, implementation, and restructuring. Priorities are for projects which focus on site-based decision making, student responsibility and accountability, assessment and measurable outcomes, and intellectual development. An implementation project in Davis District deals with peer coaching, and in Duchesne, with social studies curriculum about the Ute Indians.

Only three restructuring projects are funded each year, one each at the elementary, the middle school, and the high school level. San Juan is restructuring its yearly schedule. Whitehorse High School is the first year-round high school in the state and plans to implement competency/performance standards for high school graduation. A collaborative project has been funded at Westside Elementary in Nebo District, where teachers may send home a daily message that is received when parents phone the school for prerecorded information.

Research and Development

The State Office of Education project dealing with principle-centered character development is being implemented. Thirteen school and district teams are involved in a design/development consortium to explore ways that personal/interpersonal and managerial/organizational leadership can develop character, ultimately that of students.

An initial training of three days was held in December, 1990, for 85 educators and others. Each team studied the principle-centered leadership model and is developing its own action plans and identifying additional training needs. Response to the training has been very favorable.

If Utah's young people are to be well-prepared to deal with the challenges they will face as adults in the coming century, they must learn, internalize, and adopt for themselves a set of character-building, resilient principles to rely on throughout their lives. The character development project is committed to the accomplishment of this fundamental goal.

Research Library

In 1989-90, the second year of its existence, the State Office Research Library responded to almost 900 inquiries for assistance in investigating the educational knowledge base through the Library's access to various electronic and print sources of information. The impact of the library is growing as it becomes recognized as a clearinghouse and statewide resource for promising and proven administrative and classroom practices.

While most requests come from State Office staff for research relating to development projects and policy issues, about one-fourth originate in school districts and schools, where educators need current and reliable information to solve pressing instructional and administrative problems. The research librarian is also providing assistance in the management of agency-generated information.

Distance Learning

In FY 89-90, State Office use of the EDNET microwave telecommunication system increased dramatically, permitting staff to engage larger numbers of educators around the state in a variety of high-quality conferences, classes, workshops, and meetings. These services were provided at a reduced cost and greatly increased convenience to both originators and participants at the district level.

The State Office of Education Distance Learning Master Plan went through several development drafts by staff and the administration in preparation for presentation to the State Board. Critical needs include better statewide coordination, enhanced utilization of State Office telecommunications facilities, and secure funding for the future development of quality distance learning courses.

Hundreds of hours were spent in Roosevelt in 1990 at the request of the Uintah Basin Applied Technology Center to work as part of a team to develop, pilot test, and evaluate a variety of distance learning courses and create a class on art history and criticism. Staff visited each of the distance learning projects serving 14 districts in Utah to provide evaluation, consultation, and inservice.

Over 86 EDNET programs were developed for 10 different State Office of Education clients during 1989-90, and every district in Utah participated in at least one of those programs. The 30-40 distance learning classes offered by local and statewide program providers in public education offer hundreds of students in rural and isolated communities access to learning opportunities which would not otherwise be available to them.

The real challenge for distance learning is still consistent, well-planned, high-quality, cost-effective instruction that is shaped by informed decision making from a balanced, long-term, statewide perspective.

Services for At-Risk Students

During FY '90, the Services for At-Risk Students Section continued to serve Special Education, Chapter 1, Migrant Education, Youth in Custody, Corrections Education, and Vocational Special Needs programs. Staff facilitated statewide restructuring of the Chapter 1 program and a statewide Systems Change project assuring the least restrictive environment for students with severe disabilities.

The section also worked on the refinement of the statewide K-12 Substance Abuse Prevention curriculum, a pro-social corrections education program to prepare inmates for the demands of society, and the development of seven elementary school sites to provide multi-agency services to K-3 students at risk and their families.

The section gave technical assistance, conducted administrative reviews in all 40 districts, and flowed through over $85 million in state and $30 million in federal at-risk funds. But only 81.3% of special education weighted pupil unit amounts are presently being provided, and only $1 million was funded for non-categorical services.

Support staff (counselors, psychologists, social workers, school nurses) is insufficient. Development of multi-agency efforts are essential. Students at risk need help to prepare for post-high school opportunities and the world of work. Funds for adequate support staff are absolutely essential.

STUDENTS SERVED IN AT-RISK PROGRAMS FY 1990

Name of Program	Number of Students Served
ALCOHOL/DRUG/TOBACCO PREVENTION	442,007*

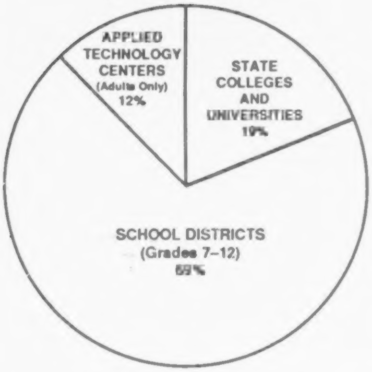
Vocational-Technical Education

During 89-90, the Vocational Education Section continued to provide development, technical assistance, training and inservice, monitoring and accountability, and liaison services for programs that prepare secondary students for careers in agriculture, business, health, home economics, industrial/technical, and other fields.

Sequential courses for 149 occupations covering six major program areas which offer both academic and vocational credit and competencies for occupational placement are now being taught. Such efforts to enhance program flexibility encourage students to focus their training on current and projected job market needs and acquire saleable skills.

Students from Weber and Ogden Districts are putting the skills they learn during the day into practice at night when they work on contract for Golden State Casting. The company is also providing on-the-job experience to business students who perform recordkeeping tasks they have learned in the classroom.

1989-90
VOCATIONAL EDUCATION
ENROLLMENT



TOTAL = 156,652

Fifty-eight juniors in Granite District filled internships in the business sector to supplement their classroom training in the Academy of Finance. The Granite teachers, who provided the Academy training, are also adjunct professors at Salt Lake Community College (SLCC).

Students in Salt Lake, Granite, Murray, Tooele, and Jordan Districts concurrently enrolled at SLCC in Academy of Technology courses are preparing for careers in computer-assisted drafting /architectural technology, electronic technology, automotive technology, and computer numerical control/manufacturing technology.

Weber District's occupational computer technology class prepares students for entry level employment in computer-aided manufacturing, desktop publishing, and other fields. The hands-on Technology/Life/Careers Program, now operating fully in 90 of Utah's 131 middle and junior high schools, was described by a national public policy consultant as "one of the finest, most progressive programs of its kind."

Twenty-four secondary schools from 12 districts are collaborating with the Vocational Education Section of the State Office to develop model comprehensive guidance and counseling programs. Counselors and administrators from the pilot/demonstration schools participated in intensive inservice training.

Last summer 114 rural high school students received hands-on experience with high-tech equipment at Southern Utah State University and Dixie College. Cache District agriculture students are involved in a three-month commodities project via satellite, using the Data Transmission Network that provides them with experience in state-of-the-art information technologies.

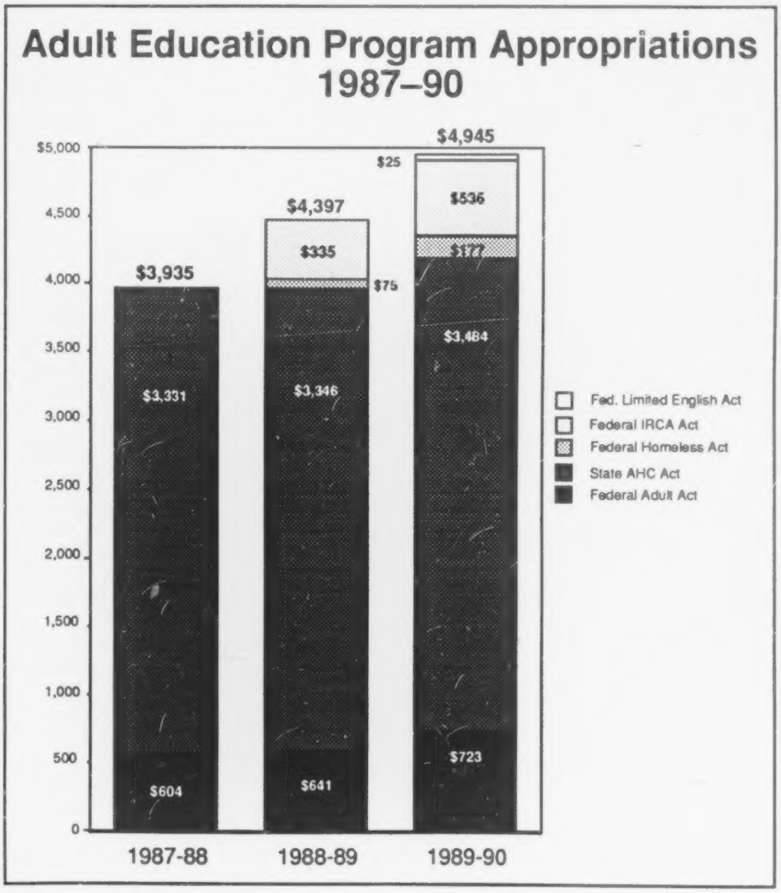
Over 50 Utah high school students who operate their own businesses applied for the 1990 Governor's Young Entrepreneur Award. In spring, 1990, ten finalists attended the Governor's Conference on Economic Development, where the three top awards were made. This program continues to encourage young Utahns to pursue their individual creative and innovative paths that can make unique contributions to our economic future.

Weber State's prestigious Radiological Sciences Program won the U.S. Secretary of Education's Award as Region VIII's outstanding vocational-technical program for 1990. The program teaches radiography, nuclear medicine, ultrasound, and radiation therapy.

Adult Education

During 1989-90, 24,841 individuals attended Adult Basic and Adult High School Education classes. Specifically, 6,003 individuals were enrolled in Basic Education (levels 0-8); 18,838 took GED and Adult High School classes (level 9-12); 40,295 high school credits were earned in Adult Basic and Adult High School classes; 1,257 adults received high school diplomas; 4,323 took the GED Test; 2,801 met GED Test requirements; 3,091 participants obtained jobs; and 750 adult enrollees were removed from public assistance.

Adult Education programs enable growing numbers of Utahns to become literate, self-reliant, and productive, taxpaying citizens. A similar purpose is achieved by Turning Point, the self-recovery program for persons widowed, divorced, separated, or with a disabled spouse. During 1989-90, Turning Point served 440 single parents and 2,270 single-parent displaced homemakers.



Adult Education Program Appropriations 1987–90

Applied Technology Centers

In 1990, the name of Utah's five area vocational centers was changed to applied technology centers (ATCs) to better reflect their progressive role in preparing workers for employment in Utah's rapidly expanding high-tech industrial marketplace. The centers continue to serve both high school students and adults with all types of backgrounds, needs, and aptitudes and to work with local and statewide business leaders to promote economic growth.

The Bridgerland ATC prepared students for 566 robotic welding jobs in its tri-county area through training on a six-axis robot. That number of jobs is expected to double in the next five years.

In fall, 1989, eight local Davis County businesses requested assistance from the Davis Applied Technology Center in upgrading 115 employees in industrial electronics, pneumatics, hydraulics, mechanical systems, and basic machining. The DATC has been able to vary the training to address each company's unique needs.

Custom-Fit Training

The Custom-Fit Training Program administered by the Utah State Office of Education assisted over 65 new and 135 expanding companies in FY 1990 by training about 3,000 of their new employees. This training was done using $2,225,000 in state funding appropriated by the Utah Legislature. The program assists business enterprises in all economic sectors with the costs of classroom training, on-the-job training, occupational curriculum development, and testing/evaluation.

Numerous companies finalizing their expansion plans are pursuing a Utah location due in part to incentives offered by Custom-Fit Training. Representatives say Custom-Fit is a major factor that puts Utah in a very competitive position because the training support is very important as are facilitation of start-up and relocation costs.

Stated the Utah Economic Development Corporation, "We feel the investment made through Custom-Fit Training in terms of trained workers, jobs created, and an enhanced tax base is returned many times over and applaud and support the efforts of the State Office of Education and local institutions to make it effective. We encourage the legislature to increase funding for this program, which can truly affect the growth and success of Utah's economy into the 1990s."

The State Office Vocational Education Section, along with school districts from throughout the state, are developing a new market-driven delivery system that emphasizes job placement for secondary students. Adequate funding will assure that, by high school graduation, all students will have certified academic and occupational basic skills; education-business partnerships will increase, resulting in more apprenticeships and cooperative work experiences; and program requirements will be competency-based.

EXTERNAL SUPPORT SERVICES

Steven R. Mecham
Associate Superintendent

Public Relations

During 1989-90, the Public Relations Section produced over 1,000 separate print, video, display, graphic art, and other items. They researched, wrote and distributed an average of four public education releases every week. Additionally they prepared special-topic reports, brochures, newsletters, and other publications.

In 1990, the section began to generate a series of "white papers" about recent accomplishments, called "Success Stories in Utah Schools" to chamber of commerce officials, legislators, leaders of the UEA and PTA, other education support organization leaders, and the media to enhance their awareness of what is happening in public education. So far, the "white papers" have dealt with such topics as the service role of the agency, quality education, the vo-tech education consortium, the school finance study, and testing.

It sustained media contacts for the State Board of Education and State Superintendent's Office throughout the year, placing news reporters in touch with appropriate educational specialists. It coordinated press conferences to announce decisions of the Board of statewide impact, discuss and clarify controversial issues, and honor the special achievements of educators.

The section conducted the 1990 Utah Teacher of the Year and the 1989-90 Drug-Free School Recognition and Elementary School Recognition programs resulting in national honors for five schools from the U.S. Department of Education. It compiled and distributed statewide news clippings about education on a bi-weekly basis.

The section developed various marketing campaigns with public service announcements, flyers, drop-in ads, posters, and logos. In fall, 1990, 21,600 copies of the new quarterly publication "StudentFOCUS" were sent statewide and to education departments throughout the nation.

During the past year, the media production division produced a 16mm film about drunk driving, an aerobic exercise video series for elementary schools, and other special videos supporting the Board's focus on futurism, educational technology, vocational education, and other topics.

School Law

During the past year, education law grew as a significant factor affecting public education in Utah. During the past six months alone, the State Office School Law and Legislation Section responded to a total of 1,110 telephone and in-person inquiries from parents, teachers, district personnel, public officials, the Utah Attorney General's Office, and interested citizens.

Questions concerned such issues as school prayer, choice of teaching materials, copyright regulations, access to school records, employee pregnancy, rights of the handicapped, residency requirements, and sexual harassment. The section acts only in a "sounding board" capacity to offer policy interpretations and insights about school law and its impact on day-to-day operation of the schools.

A long-term project of the section is to process amendments and revisions of Utah laws aimed at deregulation that enhances the autonomy of local school districts, reduces administrative burdens, and assures the timeliness of remaining statutes. The school law coordinator worked closely throughout the year with the State Land Board to monitor the management of school trust lands in the best interest of education revenue.

Impact Aid and Legislation

Utah continues to rank lowest of all states in the amount of money received per pupil in six out of 11 federal grant programs. Federal agencies, including the U.S. Department of Education, look at the size of local allocations as a measure for each state's share of federal assistance, placing a continuing burden on Utah's existing revenue for education.

The School Law and Legislation Section tracked the progress of bills affecting public education through the weeks of the 1990 Utah Legislature, providing a vital hour-by-hour update on changes and their potential consequences and providing a "hotline" service which helped educators and citizens alike to stay well-informed.

FEDERAL GRANT PROGRAM
Allocations per Pupil
FY 1989–90

	UTAH	NATIONAL
ADULT EDUCATION	$130.26	$207.86

CHAPTER 2 GRANTS	10.01	11.21
MATH & SCIENCE GRANTS	6.19	6.94
VOCATIONAL EDUCATION	15.39	20.14
ADULT EDUCATION	1.68	3.31

Education Foundation

The Utah Public Education Foundation (UPEF) was formed in 1989 in response to the need to develop additional financial support for Utah's public schools above and beyond that available through tax funds. Its mission is to build cooperation and collaboration between the private sector and public education by motivating individuals and businesses to contribute human, material, and monetary resources to the Utah public school system.

During the past year, the Foundation established a board of trustees composed of influential business and community leaders; provided UPEF chapter memberships to school districts without their own foundations; disseminated information about grant opportunities and published a quarterly UPEF newsletter; and conducted several workshops and conferences to enhance private/public sector alliances.

The UPEF also managed the Incentives for Excellence program, which received funding from the Utah Legislature in 1990 to support productive and effective educational programs in the schools. A program being developed to offer mini-grants to specific teachers and schools to meet unique local needs and generate creative and innovative efforts by individuals for educational improvement is scheduled to commence in January, 1991.

Volunteerism

In 1989-90, as budget constraints continued to extend the responsibilities of professional educators throughout the state, school volunteer services became significantly more important. A growing number of districts participated in State Office training sessions, and the state volunteer specialist received numerous requests from individual schools for technical assistance to develop volunteer programs.

Orientation and training services were provided to volunteer groups throughout the state, and a retreat featuring a nationally known volunteerism consultant was held for school district volunteer coordinators. Twenty-one small grants of $1,000 or less were given to schools and districts to support local volunteer programs. A quarterly newsletter highlighting school volunteer activities was published.

During the past year, the state school volunteer program was realigned with the Foundation office. Currently, approximately 80% of all donated funds come from people who volunteer or are involved in some other way in support of school activities or classroom learning. 1990 surveys show a steady increase in volunteer hours, the quality of volunteerism, and participation of senior citizens, business representatives, and others.

Business-Education Partnerships

During 1989-90, the External Support Services Division continued to strengthen business-education partnerships in the community based on the premise that good schools are a solid investment in Utah's economic future. The division facilitates open dialogue of a positive nature among educators, donors, and Utah citizens that stimulates constructive, timely, and lasting changes in educational policy.

State Office of Education officials serve on the Education and Technology Committee of the Salt Lake Area Chamber of Commerce, conducting seminars, forums, and other events that build a variety of one-on-one business-education partnerships and encourage businesses to adopt schools. Such relationships expand the base of responsibility and support among Utah's public education stakeholders.

Liaison Services

In FY 89-90, the Division also continued to provide vital liaison services to the Utah State Board of Education with the State Board of Regents, the Utah School Boards Association, and the Utah Public Education Coalition and coordination between the Utah State Office of Education and the U.S. Department of Education, the Governor's Office, and the offices of the Legislative Auditor General and the Legislative Fiscal Analyst.

Joining the State Board and State Office of Education as members of the Coalition, which discusses mutual concerns and issues and proposes legislation, are the Utah Associations of Elementary and Secondary School Principals, the UEA, the PTA, the Utah School Employees Association, the Utah School Superintendents Association, and the Utah School Boards Association.

State Office of Education staff also serve on the five committees of the Utah Partnership for Education and Economic Development, a cooperative effort on the part of education, business, and government to increase educational and economic development and strengthen Utah's economy. The committees focus on training, basic education, resources, research, and image, the means through which this goal can be attained.

Finally, staff of the State Office of Education are serving on the statewide Education Strategic Planning Commission and its action committees which are carrying forward the vision of "A Shift in Focus" to empower all students to reach their own highest potential. In fall, 1990, the Strategic Planning Commission adopted the following mission for public education:

...to assure Utah the best educated citizenry in the world and each individual the training to succeed in a global society, by providing students learning and occupational skills, character development, literacy, and basic knowledge through a responsive statewide system that guarantees local school communities autonomy, flexibility, and client choice, while holding them accountable for results.

Parent Involvement

In spring, 1990, the State Office of Education, State PTA, and Salt Lake City School District joined in a collaborative effort to implement a Parent Involvement Initiative, based on the premise that parents are the primary influence in a student's life and can significantly enhance their children's school success by becoming actively involved in their education. The project is structured on five committees chaired by State Office of Education staff and leaders from the other two groups.

Drawing members from business, the community, school districts, and the legislature, the five committees are addressing the following needs: public awareness, model programs, materials development, home/school/student communication, and resources. Each committee is developing and pursuing strategies, such as packets of parent involvement materials for schools and districts. Corporate sponsorship for the project is being sought.

A media campaign targeted at parents and educators and featuring well-known personalities is already underway. Henry Winkler, keynote speaker at the 1990 Governor's Conference on Parents and Families, is spotlighted in several video media spots. Additional spots featuring dramatizations and using local Utah performers are planned during the coming months. It is hoped these efforts will focus attention on the key role parents play in their children's potential for educational achievement.

CONCLUSION

As it works to transform the Utah State Office of Education from a regulatory to a service-oriented agency, the new administration has been exhilarated by the creativity, cooperation, and communication this effort is already bringing about. In recent years, as the federal government placed an ever-increasing burden for fiscal and program compliance on the states, we have tended to move from this service role. It is time we return to it.

The State Board of Education and State Office of Education are working ...**to assure Utah the best educated citizenry in the world and each individual the training to succeed in a global society, by providing students learning and occupational skills, character development, literacy, and basic knowledge through a responsive statewide system that guarantees local school communities autonomy, flexibility, and client choice, while holding them accountable for results.**

This mission is symbolic of the changes we are witnessing as Utah strives to restructure and redesign the way it delivers instruction to our districts and schools. As with most significant changes in our society, the task must be accomplished in a series of small but important steps that mark our progress toward the 21st century. Never has the challenge and the need for legislative and public support for education been greater.

We pledge to you the following: every decision we make will be made based strictly on the best interest of the student; fairness for all students will be honored; nothing will take precedence over the instructional program; we will not accept failure as final for any student; risk-taking and innovation will be practiced in our quest for improvement; and we will have an excellent teacher in every classroom and will recognize, reward, and compensate that excellence.

Public education remains Utah's most crucial investment. Our public school system is the great hope for Utah's future, the mechanism that shapes and inspires young minds, preparing today's students to take their places as our future citizens. We pledge to work hand-in-hand with all components of our public school system as they fulfill their all-important task: the education of our children.

we are here.
